SACRAMENTO REGIONAL

Our local regional was held from March 24-26 at the ARC Pavilion at UC Davis. We went undefeated throughout qualification and final matches, and won the regional placing first with our alliance captain 254 The Cheesy Poofs and partner 3189 Circuits Breakers. Our team provided volunteers that helped the event run smoothly and safely, and alumni who served as a referee and field supervisor. During the competition, we won the Excellence in Engineering Award for our unique climbing process and robot design. Additionally, Citrus Service, a program where we provide technical assistance for teams in need, passed 1000 instances of assistance since its beginning! You can learn more about the results on our website.

SILICON VALLEY REGIONAL

From April 5-8, we participated in our last regional of the season, located at the Provident Credit Union Event Center in San Jose, CA. There were a total 59 teams from across California, Chinese Taipei, Canada, Australia, and Mexico at this event. We won the regional with our alliance captain 254 The Cheesy Poofs and alliance partners 100 The

Wildhats and 2489 The Insomniacs. We also won the Quality Award, which celebrates machine robustness in concept and fabrication. You can check for more information on our website.

WORLD CHAMPS

For the ninth consecutive year, we won our division at the World Championship, going undefeated in all ten matches we played. We seeded first in the Galileo division and advanced to the Einstein Field with our alliance partners Team 3476, Code Orange, Team 461, Westside Boiler Invasion, and Team 59, RamTech. Our alliance finished fifth out of 619 teams at the event, all of which advanced to the championship from the more than 3,300 teams competing this season from around the world. Held at the George R. Brown Convention Center in Houston from April 19-22, the FIRST World Championship brought together more than 50,000 participants from 59 countries competing at all levels of FIRST programs.

BIG DAY OF GIVING

The annual Big Day of Giving is happening May 4. It's a day-long celebration of supporting non-profit organizations in El Dorado, Placer, Sacramento, and Yolo counties. Please consider making a donation to the Davis Robotics Foundation, which supports not only Team 1678 but also our efforts to spread STEM education to young students in Davis and throughout Yolo County.
